

J305

PLASTIC CAM FOR SIMPLE LATCHING

Materials:

Reinforced polyamide.
Resistant to oils and greases.

Surface finish:

Satin.

Colour:

Black (RAL 9011).

Inserts:

Brass insert with threaded through hole (thread tolerance 6H).

Special Requests:

- None.

This cam can be used in combination with any handwheel with stud. In this way, as illustrated in the sketch to the side, the assembly becomes a simple latch for securing doors. Turning the handwheel also rotates the cam, which, being a spiral shape, varies the grip thickness to latch onto the door.
