ADHESIVE BADGE IN POLYURETHANE RESIN - CUSTOMISABLE

Materials:

Bicomponent polyurethane resin badge, transparent.
With printable adhesive base.

Surface finish:

Smooth.

Colour:

Transparent.

Fixing method:

With adhesive bottom.

Customisation:

On the bottom of the adhesive badge we can print logos, trademarks, texts, pictograms or any other drawing or picture. Printing will be in four-colour. The resin badge has a slightly lenticular section which tends to magnify the image below. The adhesive badge is designed to be applied to the caps or covers of our handwheels, or to fit into the recesses on the F and G series knobs. It can also be sold separately. This option allows a better protection for the print while highlighting the underlying image. Moreover, the result lasts considerably more than a standard pad printing.

Special requests:

- Adhesive badges can be produced with customised diameters, provided that the minimum quantity necessary for the diameter customisation is reached.
