METAL SPRING AND BALL PLUNGERS LINE

BOTECO Metal Spring and Ball Plungers Line

Sub-group of the METALLINE® family dedicated to Boteco's metal spring and ball plungers: devices for positioning or locking equipment or machinery parts. Unlike the devices of the W-S family, these spring-loaded positioners are automatic and cannot be operated manually. In addition to spring plungers, in this family you will find a range of thrust screws with metal or plastic ball ends, and a small range of grub screws with brass nose pin and springless ball. For detailed information on the specifications of each individual product please consult the technical sheet.

THREADED STEEL GRUB SCREW WITH HEAGON SOCKET END AND FLATTENED KNURLED BALL POINT

Materials:
Quenched steel grub screw body with strength class 10.9.

Surface finish:
Smooth.

Colour:
Nose pin:
Natural
Grub screw body:
Black-oxide treated.

Ball:
Flattened knurled hardened stainless steel ball (Aisi 420). Optimal angle adjustment between 0° and 9°. The ball is not fixed, it can rotate.

Special requests:
